Smart Design Software

Bundled with card printer, CardStudio is a propriety software which is astute to offer essential and special features, something like "multiple preview function", "corp", "effects and Spatial Filters", and attractive "templates" for you quick editing. In addition, CardStudio enables you to output photos or image instantly by using twain-supported digital camera.

Simple and Reliable

In addition to sleek exterior, "cleaning roller" is another pleasingly innovated design, which is not merely help you clean cards easily but simply replacement. Effortlessly to take out the used cleaning roller and replace smoothly the new one to the slot with no hustling dismantling.
